FUK LOY CHUEN KAM CHUEN KINDERGARTEN

Happy Easter! Do you know what is Easter? Easter is a celebration of the relive of Jesus Christ. During Easter, we see different decorations such as eggs and rabbits, which all mean "new life". Parents, do you still remember the moment your child was born. Do you still remember what expectations you had for your child at that time? To grow up healthily, be a good child or something else? The Bible mentions, "Whatever you put your hands on, do it with all your strength." (Ecclesiastes 9:10) This means that no matter what the work at hand is, we should be actively involved, go all out, and not be afraid of hardships to complete it. In addition to remind child of their learning attitude, the job of parents is to "educate" their child. Have parents observe what their child's development needs are at this stage? Now that we have entered the second semester, we hope that home-school cooperation will help your child to improve day by day. Let us look at the tips the teacher has to give you:

happy

E A S T E R

K1

The teacher expects:

- Classmates to help each other, be a good and caring child
- Pay attention to personal hygiene and keep your appearance neat and tidy
- Willing to try new things

K2

- Children to know how to establish good relationships with others and be willing to share cooperate and communicate with others
- Be polite to others and take the initiative to care and help others
- Learn from yourself is to do it by yourself, speak up and act, and be grateful for everything

K3

- Be brave and confident
- Willing to love to explore
- To continuously cultivate their positive and active learning attitude

The fourth theme is "Food", which aims to help children understand the names and types of food, use different senses to explore food, learn to use tableware appropriately, and cultivate children's good eating habits of not being partial to food and cherishing food.

Paper Recycling Activity

The fifth theme is "Personal Hygiene". Through the process of the dirty lion king in the picture book becoming a clean person, it can enhance children's self-care ability and awareness of personal hygiene, and cultivate children to develop good hygiene habits from an early age.

The sixth theme is "Toys". Through the protagonist in the picture book sharing the fun of toys with his brother, children can learn to understand the feelings of others, strengthen their motivation to share with others, and explore the characteristics and gameplay of different toys together.

The fifth theme is "Food" which let children know the source of food and understand that food is earned hardly. We should thank Heavenly Father for giving us food and the people and animals who provide us with food, and cultivate a grateful heart.

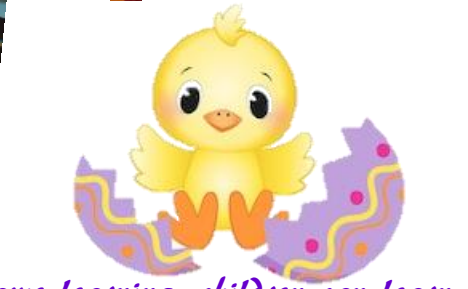

The fourth theme is "Family" allowing children to understand the different roles of family members, know the correct ways to get along with family members, understand that everyone has different emotions. Moreover, learning to care for and understand family members, and develop the habit of actively helping with housework, as well as learn to thank Heavenly Father for giving us a happy family!

The sixth theme is "Environmental Protection", which allows children to think about the value of items from different perspectives, learn about the different uses of waste, learn to care for items and recycle them, and cultivate an attitude of cherishing resources.

The fourth theme is "Animals". Through experience and game learning, children can learn about different animals from multiple perspectives, explore the relationship between humans, animals and nature, and cultivate children's attitude of loving animals and willing to protect the natural environment.

The sixth theme is "Financial Management". Through visits and game-based learning, children learn about the value of Hong Kong currency, which helps children establish a correct concept of money, and guide children to think about how to use money from different perspectives, Moreover, establishing a good financial management concepts and habits.

The sixth theme is "Financial Management". Through visits and game-based learning, children learn about the value of Hong Kong currency, which helps children establish a correct concept of money, and guide children to think about how to use money from different perspectives. Moreover, establishing a good financial management concepts and habits.

School Social Worker

Miss Lam

Fuk Loy Estate Kam Chuen Kindergarten is a learning environment full of love and joy. Under the leadership of the principal and director, the campus atmosphere is harmonious and peaceful. There are students from different nationalities, such as South Korea, the Philippines, Nepal, South Africa, Pakistan, etc., and everyone is studying in a happy attitude.

I am honored to serve as a school social worker, providing support to children, parents and teachers. I observe the development of young children at school, provide emotional and behavioral support, and help solve learning difficulties, promote good family interaction, support teachers in handling behavioral problems, and coordinate referrals to other professional organizations to provide comprehensive support services.

May God's grace and love always shine here, so that students can grow up happily, parents can be comforted and supported, teachers be filled with joy every day, and principals and directors can be empowered to lead the school towards a better future.
